

### **Journey to Villardeciervos (Zamora)**

On 29<sup>th</sup> May a group of students of 2<sup>nd</sup> year of ESO went to Villardeciervos (Zamora) to spend one week to the Centre of Environmental Education (CEAm). The teachers M<sup>a</sup> Jose Rodriguez and Pedro Larburu accompanied us.

We knew the Environment directly. We analyzed different ecosystems: the town, the mountain range, the dam, the river bank,...

We had the possibility of carrying out some workshops, proposing a global, reflective and dynamic activity. The offer of workshops was, among others, the following: sound landscape, world dances, ethnography, popular games, simulation games, education for health, maintenance and gardening, consumption, recycling of paper and "slogans".

We visited the Natural Park of the Lake of Sanabria in all its landscaping, geomorphologic and cultural wealth.

We went out on foot several times by the surroundings, and we also went on bus trips to Sanabria.

We met a muleteer, who explained to us the process of manufacture of linen, sang songs of Sanabrese folklore, got dressed with the typical suits of the land, recited poems and showed us that at eighty-four years old he is completely fit.

Besides, a very friendly forest ranger visited us, and we learned a lot from him.

The CEA<sup>m</sup> offered us a wide range of evening activities among which we emphasize: astronomy, talks, story tellers, dynamic games...

On the last day we had a party and we cried a lot.

In short: we had a very good time and we learned a lot.
