

BRIEF SUMMARY OF OPTIONAL SUBJECTS IN 1st BACHILLERATO

FRENCH 2nd LANGUAGE

The learning of this language is justified by the integration of our country in the European Union, the free movement of people and the cultural, economic, technical and scientific cooperation carried out nowadays among the countries of the world. This new situation generates an increasing need to know more than one foreign language to be able to compete with other European youth on the work market.

The learning of French, optional, is directed to all those students who have previously studied it in ESO, as first or second language, and who want to extend their linguistic competence, as well as to know cultures different from ours and to exchange opinions on problems shared worldwide.

Along Bachillerato the knowledge acquired in ESO will consolidate and more specific capacities will be developed depending on the labour future of the students, extending their communicative and grammatical competence from texts, oral and written, that present more complex morphosyntactic structures and lexical contents.

LEXICAL FOUNDATIONS OF SCIENTIFIC AND TECHNOLOGICAL LANGUAGE

Did you know that the Greeks created science and, therefore, its corresponding lexicon? Later the Romans transmitted it to all the educated languages of the West.

This optional subject will allow you to deepen and improve the knowledge of the language, especially to the students who study sciences and technology.

COMPUTER SCIENCE

In this subject the following contents will be dealt with:

- General concepts on computer science. Hardware and Software.
- Foundations of the operative system MS-DOS. Main instructions on creation and manipulation of directories, use of disk units, creation of boot disks ...
- Deepening in the environment of the graphical operative system WINDOWS.
- Manipulation of the spreadsheet Excel.
- Manipulation of the data base Access.

PSYCHOLOGY

In this level the subject appears as an introductory subject to psychology. Psychology is a human science (explanatory and interpretive) whose object of study is conduct and personality; that is, it studies human psyche.

Briefly, the program will develop the following topics:

- What is psychology.
- Biological foundations of personality.
- Different psychological approaches to explain personality (psychoanalysis, conductism,...) focusing every approach on some personality disorders.
- Personality
- Self-esteem.

It is, in short, about getting to know ourselves a bit better as members of an animal species different from all others and as individuals different from other individuals of our species.

VALENCIAN: LANGUAGE AND IMAGE. PRODUCE YOUR OWN MOVIE

The world of advertising, television and cinema in the open.

- If you want to work in the world of image with the texts peculiar of the mass media, this is your optional subject.
- If you want to enter the world of advertising and to be able to defend yourself from its perverse effects, this is your optional subject.

- If you want to have first hand news to write the school magazine, this is your optional subject.

ACTION!!

ENGLISH, SECOND LANGUAGE

Do not lose the opportunity to continue studying English in bachillerato, it will facilitate your incorporation to the labour world.
